## *Forward Looking Statements*

**This presentation contains forward-looking statements (as defined in Section 27A of the Securities Exchange Act of 1933, as amended, and in the Section 21E of the Securities Act of 1934, as amended) concerning future events, the Company’s growth strategy and measures to implement such strategy, including expected vessel acquisitions and entering into further time charters. Words such as “expects,” “intends,” “plans,” “believes,” “anticipates,” “hopes,” “estimates” and variations of such words and similar expressions are intended to identify forward-looking statements. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. These statements involve known and unknown risks and are based upon a number of assumptions and estimates that are inherently subject to significant uncertainties and contingencies, many of which are beyond the control of the Company. Actual results may differ materially from those expressed or implied by such forward-looking statements. Factors that could cause actual results to differ materially include, but are not limited to, changes in the demand for drybulk vessels, competitive factors in the market in which the Company operates, risks associated with operations outside the United States and other factors listed from time to time in the Company’s filings with the Securities and Exchange Commission. The Company expressly disclaims any obligations or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company’s expectations with respect thereto or any change in events, conditions or circumstances on which any statement is based.**

EBITDA represents net income before interest, income tax expense, depreciation and amortization. EBITDA is not a recognized measurement under US GAAP. EBITDA assists the Company's management and investors by increasing the comparability of the Company's fundamental performance from period to period and against the fundamental performance of other companies in the Company's industry that provide EBITDA information. The Company believes that EBITDA is useful in evaluating the Company's operating performance compared to that of other companies in the Company's industry because the calculation of EBITDA generally eliminates the effects of financings, income taxes and the accounting effects of capital expenditures and acquisitions, items which may vary for different companies for reasons unrelated to overall operating performance.

EBITDA has limitations as an analytical tool, and should not be considered in isolation, or as a substitute for analysis of the Company's results as reported under US GAAP. EBITDA should not be considered a substitute for net income and other operations data prepared in accordance with US GAAP or as a measure of profitability. While EBITDA is frequently used as a measure of operating results and performance, it is not necessarily comparable to other similarly titled captions of other companies due to differences in methods of calculation.
